

STUDENTS

Student Wellness

The Governing Board recognizes the link between student health and learning and desires to provide a comprehensive program promoting healthy eating and physical activity for district students. The Superintendent or designee shall build a coordinated school health system that supports and reinforces health literacy through health education, physical education, health services, nutrition services, psychological and counseling services, health promotion for staff, a safe and healthy school environment, and parent/guardian and community involvement.

To encourage consistent health messages between the home and school environment, the Superintendent or designee may disseminate health information to parents/guardians through district or school newsletters, handouts, parent/guardian meetings, the district or school web site, and other communications. Outreach to parents/guardians shall emphasize the relationship between student health and academic performance.

School Health Council/Committee

The Superintendent or designee may appoint a school health council or other committee consisting of parents/guardians, students, food service employees, district and school site administrators, Board representatives, health professionals, school nurses, health educators, physical education teachers, counselors, members of the public, and/or others interested in school health issues.

The school health council or committee shall advise the district on health-related issues, activities, policies, and programs. At the discretion of the Superintendent or designee, the council's charge(s) may include the planning and implementation of activities to promote health within the school or community. The Vallecitos Advisory Council (VAC) shall serve as the School Health Council

Nutrition Education and Physical Activity Goals

The Vallecitos Advisory Council (VAC) shall adopt goals for nutrition education, physical activity, and other school-based activities that are designed to promote student wellness in a manner that the district determines appropriate.

The district's nutrition education and physical education programs shall be based on research, consistent with the expectations established in the state's curriculum frameworks and content standards, and designed to build the skills and knowledge that all students need to maintain a healthy lifestyle.

Nutrition education shall be provided as part of the health education program in grades K-8 and, as appropriate, shall be integrated into other academic subjects in the regular educational program. Nutrition education also may be offered through before- and after-school programs.

All students in grades K-8 shall be provided opportunities to be physically active on a regular basis. Opportunities for moderate to vigorous physical activity shall be provided through physical education, recess, school athletic programs, extracurricular programs, before- and/or after-school programs, and other structured and unstructured activities.

STUDENTS

Student Wellness

The Superintendent or designee shall encourage staff to serve as positive role models. He/she shall promote and may provide opportunities for regular physical activity among employees. Professional development may include instructional strategies that assess health knowledge and skills and promote healthy behaviors.

The Board prohibits the marketing and advertising of non-nutritious foods and beverages through signage, vending machine fronts, logos, scoreboards, school supplies, advertisements in school publications, coupon or incentive programs, or other means.

Nutritional Guidelines for Foods Available at School

The Board shall adopt nutritional guidelines for all foods available on each campus during the school day, with the objectives of promoting student health and reducing childhood obesity.

The Board believes that foods and beverages available to students at district schools should support the health curriculum and promote optimal health. Nutritional standards adopted by the district for all foods and beverages sold to students, including foods and beverages provided through the district's food service program, student stores, vending machines, fundraisers, or other venues, shall meet or exceed state and federal nutritional standards.

The Superintendent or designee shall encourage school organizations to use healthy food items or non-food items for fundraising purposes. He/she also shall encourage school staff to avoid the use of non-nutritious foods as a reward for students' academic performance, accomplishments, or classroom behavior.

School staff shall encourage parents/guardians or other volunteers to support the district's nutrition education program by considering nutritional quality when selecting any snacks which they may donate for occasional class parties and by limiting foods or beverages that do not meet nutritional standards to no more than one such food or beverage per party. Class parties or celebrations shall be held after the lunch period when possible.

Guidelines for Reimbursable Meals

Foods and beverages provided through federally reimbursable school meal programs shall meet or exceed federal regulations and guidance issued pursuant to 42 USC 1758(f)(1), 1766(a), and 1779(a) and (b), as they apply to schools.

In order to maximize the district's ability to provide nutritious meals and snacks, all district schools shall participate in available federal school nutrition programs, including the National School Lunch and School Breakfast Programs, to the extent possible.

Program Implementation and Evaluation

The Board shall establish a plan for measuring implementation of this policy. The Superintendent shall designate at least one person within the district and at each school who is charged with operational responsibility for ensuring that each school site implements this policy.

STUDENTS

Student Wellness

To determine whether the policy is being effectively implemented district-wide and at each district school, the following indicators shall be used:

1. Descriptions of the district's nutrition education, physical education, and health education curricula
2. Number of minutes of physical education instruction offered at each grade span
3. Number and type of exemptions granted from physical education
4. Results of the state's physical fitness test
5. An analysis of the nutritional content of meals served based on a sample of menus
6. Student participation rates in school meal programs
7. Any sales of non-nutritious foods and beverages in fundraisers or other venues outside of the district's meal programs
8. Feedback from food service personnel, school administrators, the school health council, parents/guardians, students, and other appropriate persons
9. Any other indicators recommended by the Superintendent and approved by the Board

The Superintendent or designee shall report to the Board at least every two years on the implementation of this policy and any other Board policies related to nutrition and physical activity.

Posting Requirements

Each school shall post the district's policies and regulations on nutrition and physical activity in public view within all school cafeterias or in other central eating areas. (Education Code 49432)

Each school shall also post a summary of nutrition and physical activity laws and regulations prepared by the California Department of Education.
